Sestriere and Piedmont at the centre of international skiing

Undisputed protagonist of the next winter season in Sestriere will once again be the Alpine Skiing World Cup, reconfirming the strong competitive vocation of the Vialattea slopes. The appointment has been set for Saturday 10th and Sunday 11th December 2022, an entire weekend dedicated to women's technical disciplines. The women's giant slalom will be held on the first day and the women's slalom on the following day.

The aim is to enhance and involve the territory in order to bring the best image of Piedmont and its mountains around the world, a unique opportunity to show internationally what Piedmont can offer not only in terms of sports but even touristically. It will be a beautiful weekend of celebration and fun in the Vialattea ski resort. Various side events will frame the races to welcome the champions as warmly as possible and involve as many mountain and winter sports enthusiasts as possible. Colours, lights, music and various entertainments will be an integral part of the programme of the two days of competition and will animate the entire resort, from the arrival parterre to the streets of the village, from the squares to the clubs.

The best athletes in the world will compete on the slope of the great sporting events, the legendary Kandahar Giovanni Alberto Agnelli, a spectacular track capable of exalting the competitive gesture and providing strong emotions.

There is a nice surprise awaiting the athletes who will arrive in Sestriere to take part in the two races: the new Cit Roc 6-seater chairlift. An ultra-modern system serving the race slope, highly technological and performing, capable of improving the service and increasing the hourly capacity. It substantially follows the line of the previous 4-seater chairlift and optimises access to the slopes in the Alpette and Sises areas, bringing significant added value not only to the competitions but to the entire Vialattea ski area.

The new Cit Roc lift brings us to the celebration of Sestriere's 90th anniversary as a ski resort. In fact, it is located, as chance would have it, on the very same slope that housed the first ski lift, the iconic Alpette-Sises cable car, which went into service in January 1932. This new 6-seater chairlift will pick up the baton and become the new emblem of the ski resort. A nice present to celebrate this important 90th anniversary and to welcome the athletes to Sestriere for this new challenge.

SESTRIERE

10th/11th December 2022

In the race finish area will be set up a grandstand with over 750 seats, a hospitality tent for accredited guests and a sponsor village with various stands to entertain the public before and after the races. The streets of Sestriere will also be animated by cheerful structures set up especially for the event.

The town's central square, Piazza Fraiteve, will be the focal point on Saturday afternoon, hosting the prize-giving ceremony for the first race, the giant slalom, and the presentation of the athletes for the second race, the slalom: a unique opportunity to see the champions up close and watch the spectacular Laser Show that will close the ceremony with coloured beams of light in a festive atmosphere. As already done for the 2020 edition, the spectacular Video Mapping projected onto the Sises 2 slope with exciting plays of light and colour will also be repeated.

Higher slalom start

The challenge this year will be even more competitive between the narrow slalom poles. Compared to previous editions, the start has been raised; it will no longer be at an altitude of 2,220 metres but at 2,250 metres. It has been decided to use the men's start for the first time, adding a rather steep initial section that makes the course more technical and challenging in order to better meet the demands of spectacularity and difficulty typical of the most internationally renowned World Cup courses. Consequently, the finish line was also raised, eliminating part of the flat final section of the track.

Hotel & World Cup

In collaboration with the Sestriere Tourism Consortium, an ad hoc product has been created to stay at Sestriere, four or more nights, and follow the races of the champions. The "Hotel + World Cup" package includes a special offer in various two-, three- or four-star hotels and an accreditation to attend the races in a reserved area, with access to the grandstand until all seats are available, followed by access to the guest parterre with standing places, again in the race finish area.

The guest accreditation to attend the races is only issued to guests staying in hotels participating in the initiative and only to those who have booked through the Consorzio Turismo Sestriere. You can find all the details of the offer at www.sestriere.it, or you can request specific, customised information by writing to info@consestriere.it.

2020 edition - last World Cup stage on the Sestriere's slopes

The last edition of the World Cup to be held in Vialattea, on the slopes of Sestriere, took place on 18 and 19 January 2020 with a giant slalom and a women's parallel, two races that have already made history. On that occasion, the champions were able to give great emotions to the many fans who came to watch the spectacular descents: Federica Brignone's triumph in the giant slalom, shared on equal terms with Slovakian Petra Vlhova, and Marta Bassino's third place in the parallel slalom, won by Frenchwoman Clara Drez.

Over 30,000 people came up to the Sestriere to watch the races. The entire weekend was a succession of exhibitions, meetings, tastings, music and various animations that involved the entire village to welcome the athletes, fans and tourists in the warmest and most cheerful way possible.

The television return generated by the event emerges clearly from the official report of Infront, owner of the television rights of the World Cup races. According to the Audience Report, the competitions of 18 and 19 January 2020 totalled more than 105 million viewers in the 21 countries that broadcast the event, exceeding 160 hours of airtime.

Historical relevance of the event

Sestriere represents a traditional stage of the World Cup circuit. In fact, it is one of the ski resorts that has hosted the largest number of World Cup races. Since the first season in which the prestigious race circuit was born, Sestriere had the honour of hosting one of the first stages, back on 3 March 1967. At that time, it was the Frenchman Jean Claude Killy who won the men's downhill on the legendary Kandahar Banchetta slope while, in the women's field, Giustina Demetz and Marielle Goitschel took the top step of the podium, tied. However, we must not forget that Sestriere, even before the birth of the World Cup circuit, was also home to the legendary Arlberg-Kandahar international competitions, organised since the early 1950s.

Sestriere, in its long competitive history, has organised 65 World Cup races (30 men's and 35 women's), not counting the '97 World Championships and the 2006 Turin Olympics. Over 50 years of history that have crowned the greatest champions of world skiing.

Memorable and unique were the exploits of Alberto Tomba, winner six times on the Sestriere slopes, undisputed protagonist from 1987 to 1994. Spectacular was the double victory in the giant slalom and slalom in the 1987 World Cup, which marked the beginning, with these first two victories, of the brilliant career of the champion from Bologna.

Sestriere also holds the record of having organised the first World Cup night slalom in 1994, also won in this historic edition by Alberto Tomba.

SESTRIERE

10th/11th December 2022

Our partners

A fundamental role in the organisation of the event is played by the partners. In addition to the numerous sponsors and commercial partners, the great involvement of all the main institutions operating in the area and believing in its potential should be highlighted, from Regione Piemonte to the Sestriere Municipality, from the Consorzio Turismo Sestriere to Turismo Torino e Provincia. All united by a very ambitious common objective: to organise the event in the best possible way in order to present to the world a territory with a high tourist value.

The ski schools in the area will also make their professionalism available by working directly on the race track, as will the Taurinense Alpine Brigade, which as always supports the work of the Committee with means and professional personnel. Also involved are the doctors and nurses of ASLTO3, experts in the management of emergencies, to provide direct and qualified assistance to the athletes and the public expected to attend the races.

Kandahar Giovanni Alberto Agnelli race course

The races are held on the Kandahar Giovanni Alberto Agnelli slope in Sestriere, made famous for having launched many great champions into the Olympus of world skiing. It was also the first slope at international level to host a World Cup race at night in December 1994.

This historic slope, born with the name Kandahar Slalom, was named after Giovanni Alberto Agnelli in 1998, who died a few months after serving as President of the Committee for the Organisation of the World Ski Championships in '97.
